

TURN A HALL
OF SHAME INTO
A SPACIOUS
HALL OF FAME.

CREATING SPACE IN EVERYDAY LIFE

Our guess is that clothes, shoes and things fill your home – they are everywhere and not always where you want them to be. With ingenious storage solutions things will find their place and you will find your things. We can inspire you to recover cubic metres you may have lost to temporary solutions. Storage that creates space will bring back and improve your living space.

“Things will
find their place
You will find
your things”

INDEX

Bedroom & Closet

6

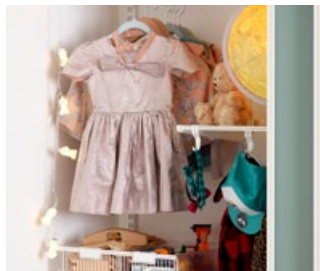

Clothes, shoes, accessories – this is where you find invaluable tips on how to plan your dream closet – or walk-in closet, regardless of the size of your space.

Hallway

18

The whole family needs a space for their gloves, bags, shoes, hats in the hallway. Find inspiration for a smart hallway to make your day run smoothly.

Children's room

26

Clothes, toys, books and other things compete for space in children's storage space. Get ideas for new ways of storing.

Laundry

34

The laundry room need a space to dry and fold, but also to store detergent and other laundry accessories.

Garage & Storage

38

Find smart ways to store and sort your tools, garden equipment and sports gear, so that they are easy to find, even in change of season.

Potential storage space

44

Store on doors, under the stairs, in the kitchen or create your own home office. Find your homes' potential storage space.

A GREAT
TALENT NEEDS
GREAT SPACE.

BEDROOM & CLOSET

A closet, with details adapted to your needs will give a great overview and make your clothes and other items easy accessible. Sliding doors that matches the room will create calm.

Interior: Classic (White), Décor (Birch).

CLOTHES IN ORDER, A DREAM WITHIN REACH

It's real – ingenious solutions will make the best use of your unused space. Clothes, shoes and accessories that tend to spread will find their proper place and you will get a restful bedroom. Smart details in your wardrobe give you a good overview and make choosing today's outfit a lot easier. Your morning routines will get smoother.

Place the clothes in your closet in the order you wear them top down. Interior solutions adapted to each item will make your day run smoother.

For efficient storage of your accessories, play with different depths by adding smart Utility shelves and hooks to your closet.

A Gliding tie and belt rack has 20 hooks for all your favourite accessories.

Get an overview and access to your shoes with a Gliding shoe rack, for both flats and high heels.

Mesh drawer dividers separate your items and gives a structure in your closet.

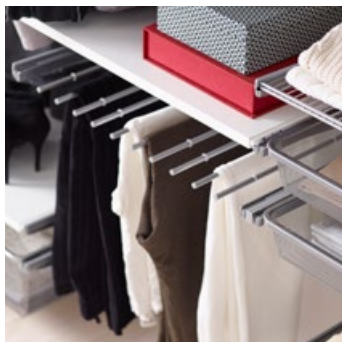

Add dividers to your wire shelves to create tidy piles.

Dividers for shelf baskets are perfect for separating your clothes by colour or type and also prevent clothes from falling out.

Keep your trousers crease free and accessible with a pull out Gliding pant rack.

Interior: Wall hang system (White), Classic (White).

“You will get
a restful
bedroom”

Décor creates a dressed look, but keeps the flexibility of the interior system. Décor is available in white, walnut and birch.

Interior: Wall hang system (White), Décor (White)

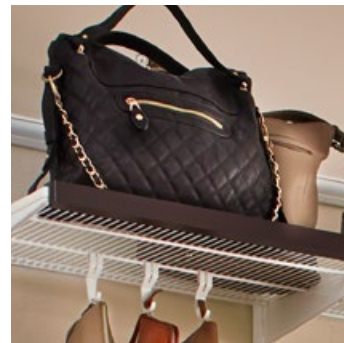

Small details like the Mesh drawer dividers make all the difference when it comes to keeping your closet organised and neat.

Accessory tray helps keep track of jewelry, cufflinks and other small items in your closet.

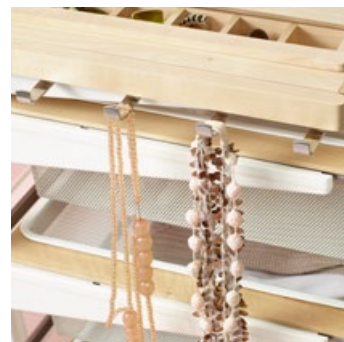

Fascia keeps the wooden look and gives visibility of the things stored on the top shelves.

Put the things you use frequently or want to expose on a Décor shelf.

The Hook rack add extra storage smartness on the side of the bracket.

Use both walls and floor when creating your walk-in closet.
Interior: Wall hung (White), Décor (White).
Freestanding (White), Décor (White).
Utility (White).

Make the most of your space. Use two sections in 45 cm width, to create a dream closet in less than one meter.

CREATE SPACE
FOR OFF SEASON
THRILLS.

HALLWAY

A WELCOMING HALLWAY BRINGS PEACE TO YOUR HOME

The hallway is the gateway to your home. It should welcome you after a day at work and make you glad to touch base again. This is where different equipment for hobbies and interests in a family needs to coexist. It's where shoes, bags, coats, jackets, mail, keys, sports gear and other things fight for space. A functional storage solution will bring space and peace to this important part of your home.

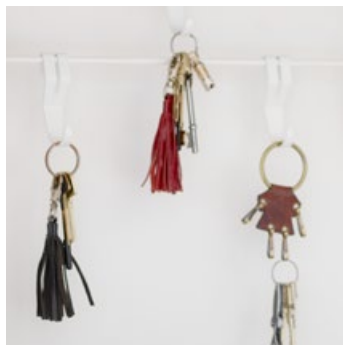

A smart way of using all your space is to place shallow Utility shelves in combination with deeper wire shelves.

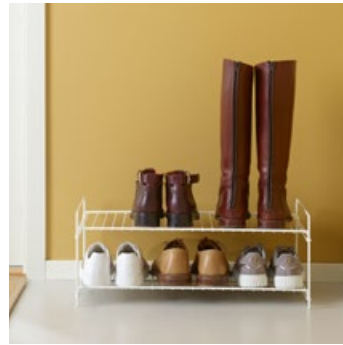

Choose shallow baskets for your clothing, to be able to find your things quickly in the morning.

The shelf hook has many possible functions. For example you can hang your bags or keys.

Store your most frequently used shoes in a stylish way on the classic shoe rack.

The hallway needs storage functions for clothes, but also for bags, mail, keys and other things passing through. Dedicated products and accessories for each item is key for keeping track.

Interior: Classic (White), Utility (White).

When you plan your hallway storage, have all family members and their specific belongings in mind. A hallway is also easier to keep clean when the storage hangs on the wall, leaving the floor space clear.

Interior: Wall hung system (White), Classic (White).

”A functional storage solution will bring space and peace”

Divide wire shelf baskets into different compartments for each family member and his or her things. Add shelf hooks underneath for easy hanging of clothes and bags.

Label holders on each drawer or shelf basket help you remember what goes where.

Use all the space up to the ceiling and arrange your winter and summer shoes according to season.

ALL THE SPACE
YOU NEED FOR
EVERYDAY PLAY.

CLOTHES AND SHOES GETTING ALONG WITH TOYS AND BOOKS

Children's need for space in their everyday play is endless. At the top of many parents' wish list is a working storage solution. Children want it too. Picture clothes and shoes living happily side by side with toys and books. A storage system created to fit individual needs as your child grows is designed for how high your child can reach at different ages, how change in season affects storing and how important it is with a clear overview.

A Utility shelf with boxes and trays will create order in a child's room. Just lift boxes of pens to bring them to the drawing board.

Plastic boxes perfectly placed on a shelf tray keep track of all the small things in the kids' room.

Use wallhung Classic and Utility to keep pens, paper and other hobby items neatly organized and off the floor.

The closet can be rearranged as the kids grow using Classic wall hang system. Add extra storage by using Utility on the door or on the other walls.

Interior: Wall hung system (Platinum), Classic (Platinum), Utility (Platinum).

Hang clothes facing front on a valet rod, when the depth is not enough for hanging clothes on a regular closet rod, or when you want you expose your favourite dress.

Save time by preparing the outfit for next day on an expandable valet rod.

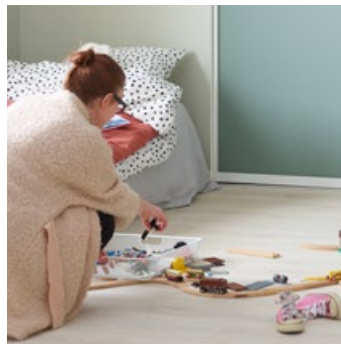

Seasonal clothing and shoes can easily be stored on the top shelves and be moved down when seasons change.

Small toys can be stored in gliding mesh or solid drawers, which give easy access and overview and prevent things from falling out.

Lift out and put the drawers of toys on the floor when needed. When the play is over, easily put them back in the frames.

Plan children's storage in their height so that they can easily reach clothes and toys.

Interior: Wall hung system (White), Classic (White), Utility (white).

“The need for space in children’s everyday play is endless”

LAUNDRY

”Create all the
extra space
you need”

*Interior: Wall hang system (White), Classic (White),
Utility (White). Drawer system (White).*

DON'T FORGET THE FORGOTTEN ROOM

In many homes the laundry room is a forgotten room. Still, it's a space that needs smart storage solutions to create an efficient workflow. With careful planning and much attention to details, you can create all the space you need to sort and fold clothes, store detergents, linen, towels and clothespins. A spacious laundry room will make weekly or even daily visits more agreeable. Pleasant and maybe even fun?

The Utility rack with tool holders is perfect for storing the cleaning tools.

A Utility board with boxes and trays keep the small items sorted.

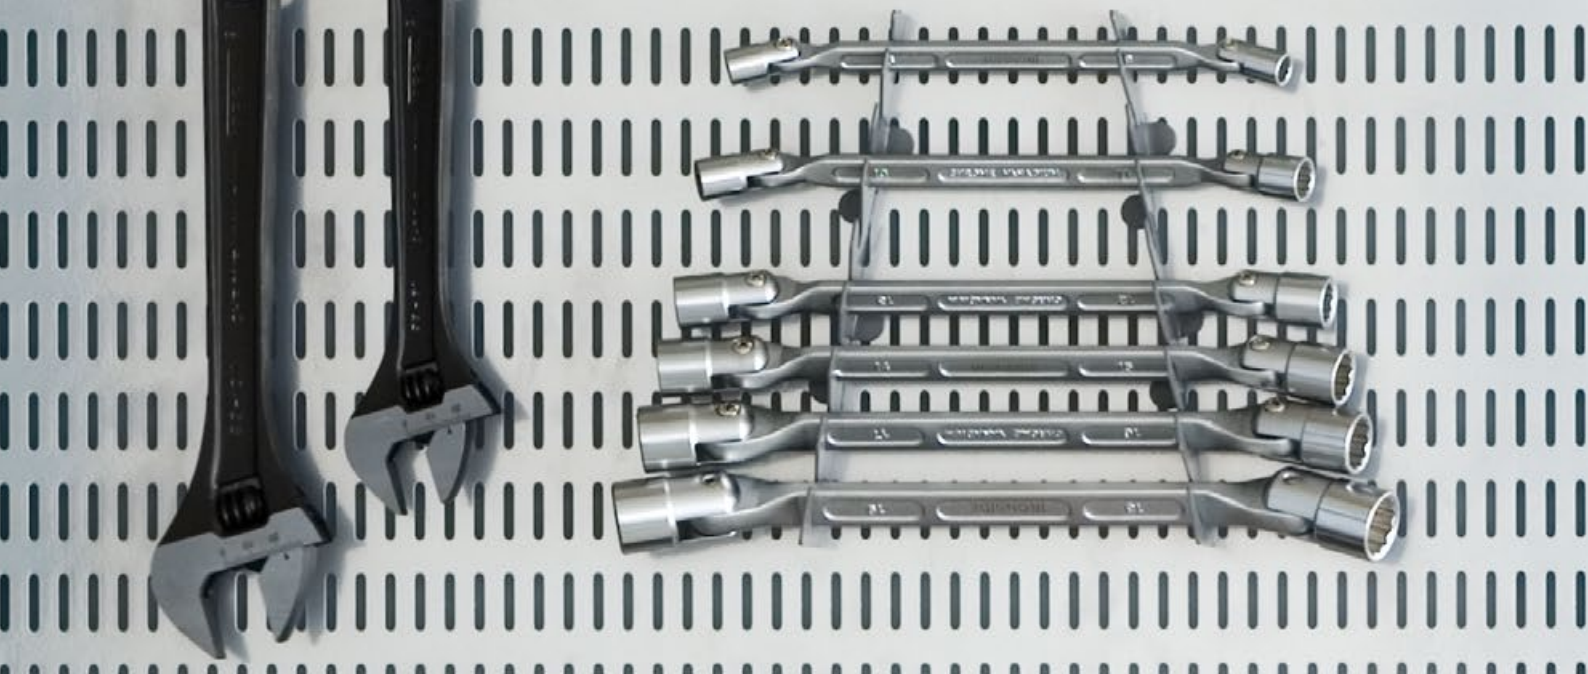

Door and wall racks create new storage space when the laundry area is limited.

The drying shelf can be folded back when not used.

GARAGE & STORAGE

For rubber boots and messy garden things, use ventilated shelves to let gravel fall through and make the storage area easier to keep clean.

Interior: Wall hung system (White), Classic (White), Utility (Platinum).

MAKE ROOM FOR SEASONAL STORAGE. AND YOUR CAR.

Storage of outdoor furniture, garden tools and sports gear often leave little or no room in the garage for the car. Storing things along the walls is the obvious solution. Elfa makes room for tools, gadgets and other equipment. Seasonal storing of skis, golf and hockey gear, paint cans and all your stuff for the garden will fit perfectly. Clever use of garage space will make room for everything – including your car.

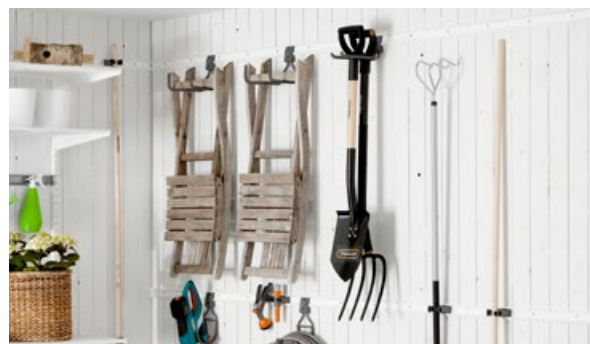

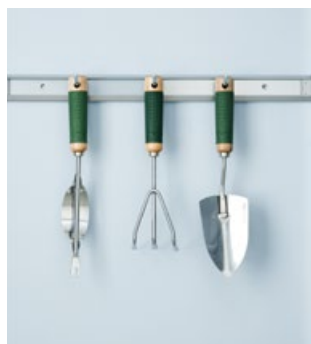

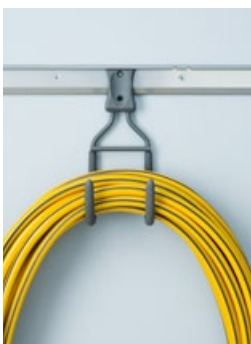

The wide ladder hook is great for storing ladders, but also the garden hose.

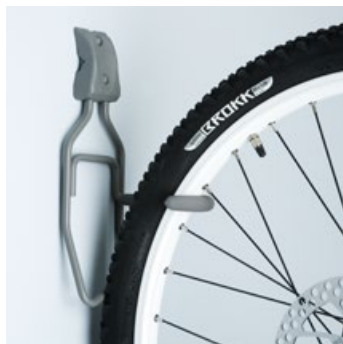

Garden tools are kept intact by always cleaning them before the winter season and storing them neatly on a tool hook.

Use the Utility rack with a variation of hooks to give a dedicated space to all your garden tools and gear.

Above: Make sports gear easy to find and access when needed. Free up floor space by using Classic wall hang system.

Free up floor space by hanging your bike on a bike hook.

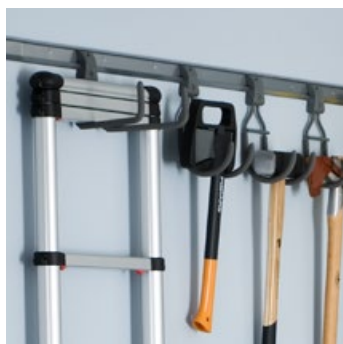

Dedicated accessory boxes for your small items like screws, nuts and plugs makes it easy to find your things when you need them.

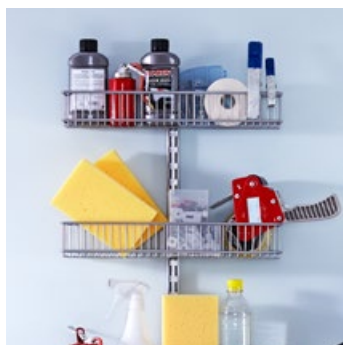

The wrench holder has space for up to eight tools.

The top track will hold all your equipment, even the heavy tools and gear.

A Door and wall rack can be placed on a door or straight on the wall. Use baskets of different heights to adapt your storage.

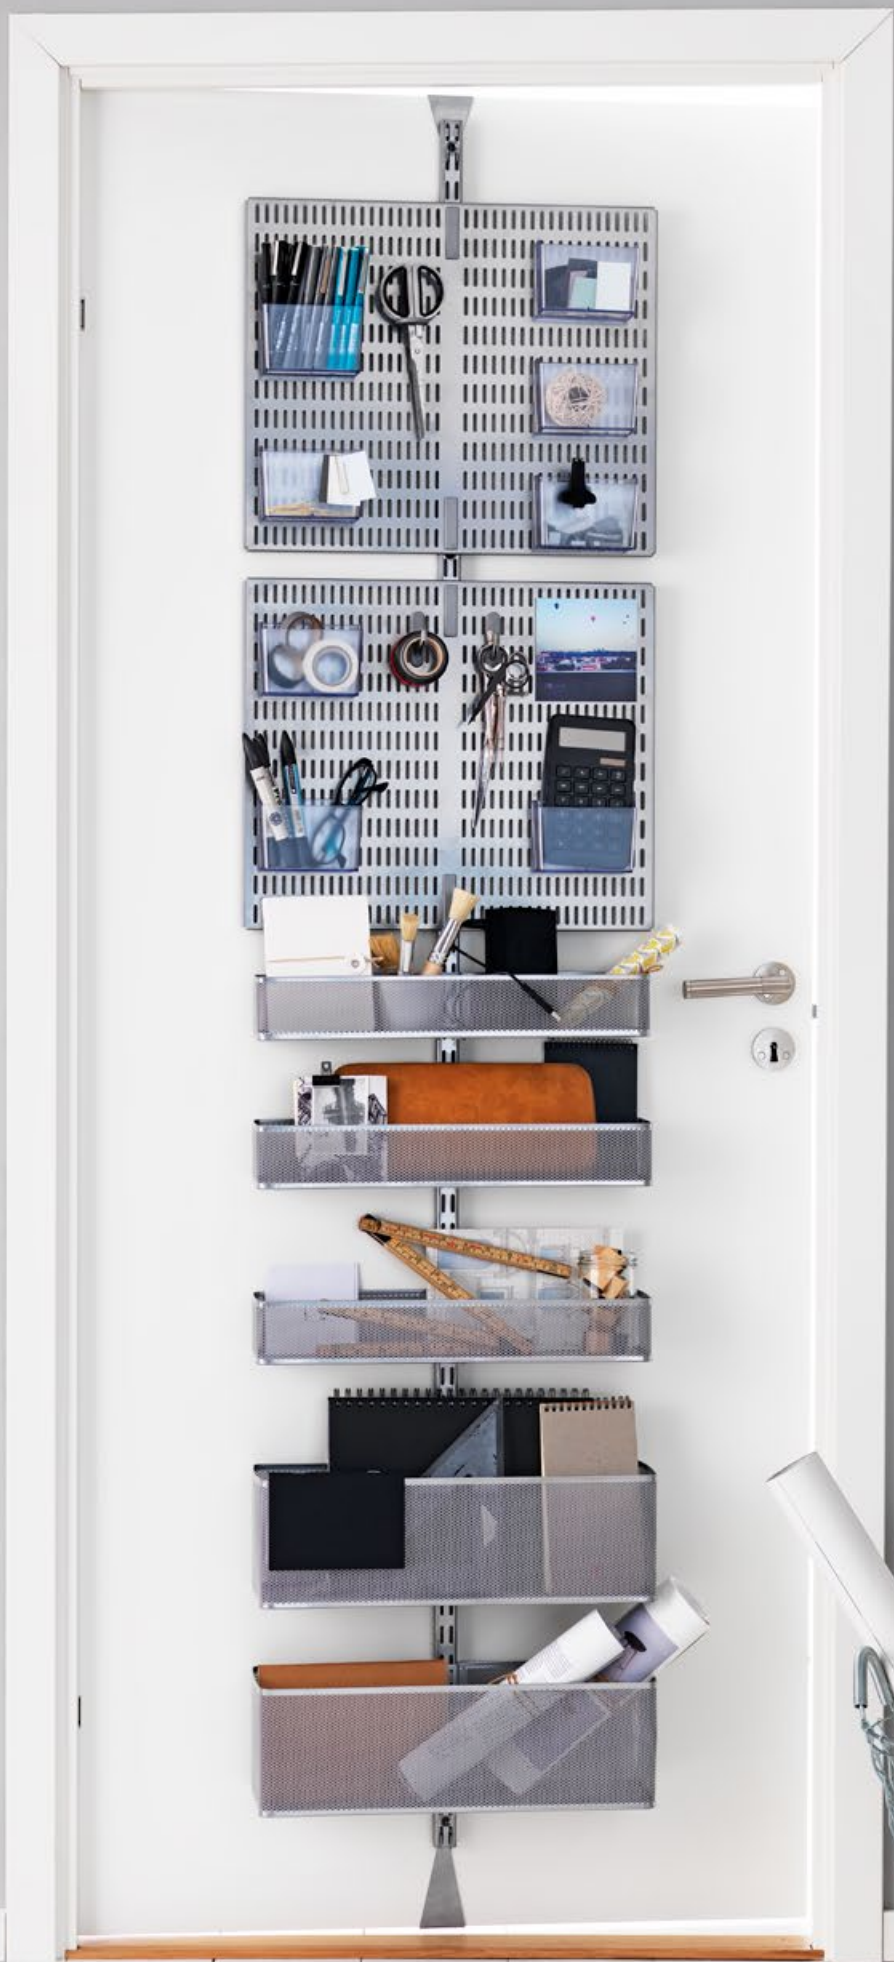

The key to an easy overview and a tidy looking garage or storage is keeping the things off the floor.

Interior: Wall hung system (Platinum), Classic (Platinum), Utility (Platinum).

”Storing things
along the walls
is the obvious
solution”

POTENTIAL
STORAGE SPACE

*Interior: Wallband system (White),
Melamine shelves (White).*

MAKE USE OF YOUR UNUSED SPACE.

Look around your home. Potential storage space is everywhere – in your kitchen, your hallway, bedroom and basement. Look even further and you will find space you didn't even know you had. Do you have the optimal solution for the space under a staircase or a sloping ceiling? Identify the unused or hidden places in your home. With storage to fit your needs you get more space and you will find that everyday life becomes a little easier.

The Freestanding system makes use of the space under sloping ceilings.

The space under stairs can be maximized by, for example, using drawer systems in different heights.

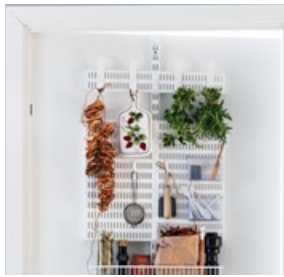

With Elfa products, all you need is 35 cm in depth, to create a complete storage wall.

The Wall hang system works well also for storing kitchen utilities and groceries.

The Door and wall rack uses the space efficiently and the over door hook keeps the rack in place without drilling.

Open shelving uses the space well and gives fast access to your most frequently used kitchen utilities.

The Wall hang system works just as well in the kitchen as in the wardrobe.

Utility products like boards and trays work well in wall spaces, limited in both width and depth.

Interior: Wall band system (White), Melamine shelves (White).

“Potential storage space is everywhere”

Wall bands with melamine shelves give a classic and stylish look for your favourite things.

The wall based system with Wall bands enables you to use all the space, for example under a sloped ceiling or above a door.

Create a home office without drill holes in the wall by using Freestanding system. Also to maximize the space under sloping ceilings Freestanding is the answer.

CREATING SPACE SINCE 1948

For more than 70 years Elfa has supported people's everyday life by creating space with simple and functional design. The company was founded in Sweden in 1948 by innovator and entrepreneur Arne Lydmar. Who knew the ingenious invention of a plastic coated wire would be just as relevant in 2018 as it was then? Because what once started with a simple but clever dish rack has today evolved into a complete storage offer for homes all over the world.

The wire dish rack "Elfa", designed by world famous Nils Strinning, here mounted on the wall, created space by the kitchen-sink.

Today Elfa offers storage products for the entire home. Still with focus on simple but ingenious solutions which optimise your space. Here a hallway closet with top hung sliding doors and Classic wall hang system leaving the floor space clear and easy to clean.

THE COATED WIRE THAT LED THE WAY

In the late 40's Elfa developed a technique of coating steel wires with a special plastic, which made the products hygienic and less rust-prone. This invention was ground breaking in the industry! Shortly thereafter products like the Elfa dish rack, shoe rack and wire drawers were very common sights in Swedish homes as well as across Europe.

Today, the coated wire has become one of the most significant symbols for Elfa worldwide. It is used in wire shelves and baskets, as well as in the relaunch of the well-known and appreciated shoe rack, to name just a few.

In the early days Elfa wire products were produced by hand. Today the production in Västervik (Sweden) and Koszalin (Poland) is highly modern and automated and every year over 2 million wire products are produced and distributed to consumers all over the world.

FOR EVER-CHANGING NEEDS.

No matter who you are and what stage of life you are in, storage is needed. With durable products and ingenious solutions, which can be rearranged and extended throughout life, Elfa can help make the most of your space. Whatever your storage need for the time being.

Same products - different needs. The top track is the only thing screwed to the wall. All other products are hung or clicked in place, which makes the solution easy to rearrange.
